

A & A GLOBAL INDUSTRIES, INC.

MANUFACTURING CORPORATE PROFILE

**Serving your injection molding,
powder coating, and tool and die needs.**

ABOUT US

A & A Global Industries manufacturing divisions consist of three distinct services. These are:

- **State-of-the-art Injection Molding**
- **Powder Coating**
- **Tool & Die**

Located in the Baltimore-Metro area, A & A effectively and efficiently services companies located in the Mid-Atlantic region. Utilizing easy access to shipping corridors allows A & A Global a distinctive reputation for timely and economical freight logistics delivering your parts, when promised, at very competitive pricing.

Our mission is to work extensively with our clients to provide exceptional, quality-driven products for their manufacturing needs. As a committed partner, A & A Global Industries can

service any job size for any industry while providing cost effective pricing so critical in today's challenging economic times.

A & A Global Industries is proud to currently manufacture and service for the following industries:

Medical
Automotive
Packaging
Health & Beauty
Toys & Electronics

Tools & Appliances
Sheet Metal Houses
Stamping Manufacturers
Casting Manufacturers

A & A is ISO Compliant

“**Making quality parts
for quality people**”

HISTORY

A & A Global Manufacturing utilizes advanced technological equipment and a team of highly experienced tradesmen who are experts in their respective fields.

- **1980** A & A Plastics is started in order to manufacture plastic toy capsules. Originally A & A had five injection molding machines. Today there are 21 machines.
- **1993** A & A Global Industries launches the Powder Coating Division to complement its bulk vending division by powder coating the bulk vending machines.
- **1994** A & A Global Industries sets-up the Tool & Die division to build and maintain its own molds.

MANAGEMENT & STAFF

In the manufacturing facilities, the corporate culture is based on the simple notion that “communication is a partnership”. Employees can easily access executive management to receive answers in a quick and efficient manner. This way A & A is poised to take action to easily react to any change needed to make the partnership with our customers a success.

SERVICES

INJECTION MOLDING

Injection molding facilities are operated and maintained by experienced staff that manufactures to the highest quality and precision standards in plastic injection molded components. There are 21 injection-molding machines that range from 75 to 500 ton capacities.

The injection molding facility offers value added secondary operations, decorating and assembly to expedite the customer's manufacturing process. The facility can package, store, and ship customer's products right from the location the parts were produced.

The process staff has many years of experience and expertise molding engineered resins of all varieties.

A & A also provides engineering services as an added value to its customers. These services range from part design and prototype creation, to making the part more easily injectable. A & A can also offer direct sources overseas to build durable molds at a substantial savings over US manufacturing.

TOOL AND DIE

A professional staff of mold makers and engineers combine their expertise to design, produce, maintain, and repair the most complex and advanced injection molds.

Tool and Die's capabilities include computerized machining, turning centers, electrical discharge machining (EDM) and a variety of high-tech grinding tools. Customers know their mold investment is in good hands.

POWDER COATING

With modern equipment and unique expertise, A & A provides the highest quality powder coating job. Powder Coating offers a significant upgrade to liquid painting methods as well as being more cost effective. A & A's state-of-the-art 126,000 sq. ft. facility strictly adheres to EPA standards and regulations resulting in an environmentally friendly and safe atmosphere. No run is too large or too small, allowing A & A to serve all needs.

Powder coating capabilities include:

- Color matching on 20 foot Wagner Reclaim System with eight automatic guns and two hand guns
- Parts up to 10' long x 6' high x 3' wide can be run on our variable speed MonoRail Conveyor
- Ability to apply polyester, epoxies, urethanes, and hybrids in all finishes. This gives a flat to high gloss finish.
- Other finishes include textures, wrinkles, and veins per customer specification
- 288 Cubic foot batch oven for small and custom jobs
- Offer special packaging and taping thread protection upon request

FUTURE VISION

A & A Global's manufacturing division is always growing. Constantly up to date on the latest manufacturing trends, A & A hires the most knowledgeable people in the industry to manage the technology and it's applications as it relates to customers' parts. These professionals have unique expertise to maximize machining capabilities to produce parts more efficiently and cost effectively.

The growth plans for the company are based on maintaining and upgrading state-of-the-art equipment as it becomes available and continuing the philosophy that "communication is a partnership".

**communication
is a partnership**
